DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of group I, claims 1-12 in the reply filed on 4/22/05 is acknowledged. The traversal is on the ground(s) that the subject matter is related. This is not found persuasive because of the diverse classifications of the groups.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Albert et al.

Albert et al disclose a flexible display element attached to the one or more materials of the article of clothing (col. 4, lines 47-58, col. 7, lines 10-25); and circuitry connected to the flexible display element, the circuitry controlling the flexible display element ((col. 18, lines 51-67)).

As for claims 2-, Albert et al further the flexible display element is permanently attached to the one more materials (col. 18, lines 51-67, col. 19, lines 1-10), the flexible display element is sewn to the one or more materials (col. 18, lines 51-67, col. 19, lines 1-10), is adhesively attached to the one or more materials (col. 18, lines 51-67), a shoe (col. 19, lines 1-10), the article of clothing comprises a hat (col. 19, lines 1-10), article of clothing comprises pants (col. 19, lines 1-10), a belt (col. 19, lines 1-10), a wireless communication element (col. 15, lines 52-53), the circuitry displays advertisements (col. 16, lines 19-30), the circuitry displays promotions (col. 16, lines 19-30).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Guritz discloses multiple purpose optical displays for articulating surfaces.

Bennion discloses a lighted display including led's mounted on a flexible circuit board.

Lewis et al disclose a display sticker.
